

Contents

Chapter 1 KINETICS	1
On the possibility of the posttransition state classical trajectory predictions of energy deposition in the reaction products' degrees of freedom <i>B. I. Loukhovitski and A. S. Sharipov</i>	3
Syngas/air mixture induction length reduction in the flow reactor experiments due to the exposure of nitrogen and air to the glow discharge <i>I. V. Arsentiev, V. D. Kobtsev, S. A. Kostritsa, D. N. Kozlov, A. S. Sharipov, V. V. Smirnov, and S. A. Torokhov</i>	5
Roles of ionic reactions in nanosecond discharge plasma-assisted temperature-dependent pyrolysis and oxidation of methane fuel <i>Qi Chen, Jintao Sun, Jianyu Liu, and Baoming Zhao</i>	7
Reaction kinetics of CH ₄ and C ₂ H ₆ with O ₂ in excited electronic states: Reaction pathways and rate constants <i>A. V. Pelevkin and A. S. Sharipov</i>	13
State-to-state model for hydrogen–air combustion <i>I. N. Kadochnikov and I. V. Arsentiev</i>	15
Investigation of the nonequilibrium excitation of carbon monoxide molecules during the oxidation of methane behind shock waves <i>N. Bystrov, A. Emelianov, A. Eremin, and P. Yatsenko</i> ...	17
The soot optical properties in premixed acetylene/air flame measured by laser-induced incandescence <i>A. V. Eremin, E. V. Gurentsov, E. Yu. Mikheyeva, and R. N. Kolotushkin</i>	21

Influence of doping with various hydrocarbons on pyrolysis of acetylene <i>A. V. Eremin and E. Yu. Mikheyeva</i>	24
Bridging nucleation reactions between acenaphthylene and naphthalene: A theoretical study <i>A. S. Semenikhin, A. S. Savchenkova, I. V. Chechet, S. G. Matveev, M. Frenklach, and A. M. Mebel</i>	28
Reactions of transformation of the five-membered ring of cyclopentaphenanthrene upon interaction with acetylene: A theoretical study <i>A. S. Semenikhin, A. S. Savchenkova, I. V. Chechet, S. G. Matveev, I. A. Zubrilin, M. Frenklach, and A. M. Mebel</i>	32
Modeling of the complete mechanism of oxidation of phenyl radical under combustion conditions <i>G. I. Tolstov, I. A. Medvedkov, D. P. Porfiriev, M. V. Zagidullin, A. M. Mebel, and V. N. Azyazov</i>	36
The energies and molecular parameters involved in the reaction of CH + 1,3-butadiene <i>A. Nikolayev, A. M. Mebel, and V. N. Azyazov</i>	38
Dimerization of polyaromatic hydrocarbon molecules with formation of E-bridge bond: A theoretical study <i>A. S. Savchenkova, A. S. Semenikhin, I. V. Chechet, S. G. Matveev, M. Frenklach, and A. M. Mebel</i>	42
Chapter 2 CLUSTERS AND NANOSTRUCTURES	47
Size-dependent effects in atomic clusters <i>A. S. Sharipov and B. I. Loukhovitski</i>	49
Simulation of homogeneous nucleation of boric anhydride vapor in axisymmetric nozzle <i>A. M. Savel'ev, V. A. Savelieva, D. I. Babushenko, and N. S. Titova</i>	51

Stochastic molecular dynamics of formation of porosity nanostructures and condensation clusters <i>G. I. Zmievskaya</i>	54
Chapter 3 IGNITION AND COMBUSTION	57
Spherical diffusion flame in microgravity conditions: First results of joint Russian–American space experiment “Flame Design — Adamant” <i>S. M. Frolov</i>	59
Influence of nonequilibrium factors of key reactions on synthesis gas ignition <i>I. V. Arsentiev and I. N. Kadochnikov</i>	63
Numerical simulation of hydrogen combustion in a supersonic air flow using various computational models <i>S. N. Batura, N. V. Kukshinov, and D. L. Mamyshev</i>	65
Numerical study of ignition and combustion of diborane jets in supersonic cocurrent airflow <i>L. V. Bezgin, V. I. Kopchenov, A. M. Savel’ev, and V. A. Savelieva</i>	68
The study of dielectric barrier discharge properties for the conditions of plasma-initiated combustion <i>A. P. Torbin, A. V. Panova, and P. A. Mikheev</i>	71
Mechanism and characteristics of gel fuel ignition <i>O. S. Gaydukova, D. O. Glushkov, A. G. Nigay, and A. G. Kosintsev</i>	75
Investigation of ignition of H_2-O_2 , CH_4-O_2 , and $C_{10}H_{22}$ –air mixtures during photodissociation of O_2 molecules by laser radiation <i>S. Yu. Volkov, V. D. Kobtsev, S. A. Kostritsa, V. V. Smirnov, N. S. Titova, and S. A. Torokhov</i>	78

Specific features of polymethyl methacrylate combustion with and without triphenyl phosphate additives: Investigation by laser-induced fluorescence and coherent anti-Stokes Raman spectroscopy <i>S. A. Trubachev, O. P. Korobeinichev, V. D. Kobtsev, D. N. Kozlov, S. A. Kostritsa, V. V. Smirnov, S. Yu. Volkov, and Amit Kumar</i>	80
Laminar burning velocity of individual hydrocarbons and kerosene surrogates <i>S. S. Matveev, D. V. Idrisov, and A. S. Semenikhin</i>	82
Experimental and numerical study of combustion of aviation kerosene TS-1 surrogates <i>D. V. Idrisov, S. S. Matveev, S. G. Matveev, N. I. Gurakov, I. V. Chechet, and A. S. Semenikhin</i>	86
Integrated experimental study using infrared thermography method on behavior of wood constructional materials in fire conditions <i>D. Kasymov, V. Agafontsev, E. Loboda, Yu. Loboda, and V. Reyno</i>	89
Combustion characteristics of large porous titanium particles falling freely in air <i>O. G. Glotov, D. Yu. Belyaeva, N. S. Belousova, and M. A. Korchagin</i>	93
Numerical solution of the conjugate problem of heterogeneous metallized solid fuel combustion with regard for gasdynamic effects <i>K. M. Moiseeva, A. Yu. Krainov, and V. A. Poryazov</i>	97
Effect of metallic fuel nature on combustion characteristics of ammonium perchlorate / binder / metal composite solid propellants <i>V. A. Poryazov, O. G. Glotov, V. A. Arkhipov, G. S. Surodin, and Y. A. Dubkova</i>	100
Effect of boron on the combustion characteristics of metallized high-energy materials <i>A. Korotkikh and I. Sorokin</i>	103

The burning rate of high-energy materials containing metal fuels based on Al and B
A. Korotkikh, I. Sorokin, E. Selikhova, and V. Arkhipov 106

Combustion of $p\text{Si-NaClO}_4 \cdot \text{H}_2\text{O}$ compositions with microparticles of nanostructured silicon at the near-stoichiometric equivalence ratios of components
V. N. Mironov, O. G. Penyazkov, E. S. Golomako, and S. O. Shumlyayev 109

The combustion rate of ammonium perchlorate based metallized composite solid propellant in the force field
A. Yu. Krainov, V. A. Poryazov, and D. A. Tsvetkova 113

Calculation of the ignition delay time of metallized solid propellant by a convective high-temperature flow
V. L. Goiko, V. A. Poryazov, and A. Yu. Krainov 116

Chapter 4 ENGINES AND POWER PLANTS 119

Combined propulsion system for perspective reusable space transport systems of aviation type
A. I. Lanshin and O. V. Sokolova 121

Combustion and NO_x formation modeling using eddy resolving turbulence models
A. M. Sipatov, A. V. Khokhlov, T. V. Abramchuk, and R. A. Zagitov 125

Comparative analysis of two models of turbulent combustion of an imperfectly prepared lean mixture of methane and air using Reynolds-averaged Navier–Stokes and scale adaptive simulation methods
M. V. Drobyshev, A. N. Dubovitsky, A. B. Lebedev, and K. Ya. Yakubovsky 129

Computational and experimental studies of a low-emission burner for a perspective turbojet engine with the compression ratio exceeding 40
M. A. Danilov, M. V. Drobyshev, A. N. Dubovitsky, F. G. Markov, and A. V. Vladimirov 133

Suppression of high frequency modes of unstable combustion in low-emission combustors of industrial gas turbines <i>A. N. Dubovitsky, E. D. Sverdlov, K. S. Pyankov, H. F. Valiev, and S. A. Cheprasov</i>	136
Influence of flow swirling on combustion of aluminum powder aerosuspension in a chamber with extension <i>A. Yu. Krainov, K. M. Moiseeva, and V. A. Poryazov</i>	139
Pulse thermal control of moisture in aircraft liquid fuels <i>A. A. Starostin, D. V. Volosnikov, and P. V. Skripov</i>	142
Simulation of compressible and incompressible flows by meshless methods of smoothed particle hydrodynamics <i>S. M. Frolov, V. S. Ivanov, Vas. S. Ivanov, R. R. Tukhvatullina, and B. Basara</i>	146
Thermal and caloric equations of state for nitrogen: Application to cryogenic injection conditions <i>N. M. Kuznetsov, S. N. Medvedev, S. M. Frolov, F. S. Frolov, B. Basara, and K. Pachler</i>	152
Outdoor tests of a towed boat model with fuel combustion in a bottom cavity <i>S. M. Frolov, S. V. Platonov, K. A. Avdeev, V. S. Aksenov, V. S. Ivanov, A. E. Zangiev, I. A. Sadykov, F. S. Frolov, and I. O. Shamshin</i>	155
Chapter 5 SHOCKS AND DETONATIONS	159
Relaxation processes behind the shock wave in air <i>A. I. Bryzgalov</i>	161
Parallel solver for the simulations of detonation waves on unstructured grids <i>A. I. Lopato and A. G. Eremenko</i>	165

Investigation of the processes in the high-pressure chamber of shock tube <i>N. G. Bykova, I. E. Zabelinsky, P. V. Kozlov, Yu. V. Tunik, V. Yu. Levashov, and V. O. Mayorov</i>	169
Detonability of fuel–air mixtures in terms of deflagration-to-detonation transition <i>S. M. Frolov, V. I. Zvegintsev, I. O. Shamshin, M. V. Kazachenko, V. S. Aksenov, and I. V. Bilera</i>	174
Organic waste gasification with highly superheated steam produced by cyclic detonations of methane–steam–oxygen mixtures <i>S. M. Frolov, V. A. Smetanyuk, I. O. Shamshin, V. S. Aksenov, I. A. Sadykov, A. S. Silantiev, and F. S. Frolov</i>	178
Chapter 6 TECHNOLOGIES	183
Control of the composition of gas phase reaction reagents using a liquid electrocapillary resonator <i>P. S. Kuleshov</i>	185
Catalytic processes on the surface of thermal protection silicon-based coating under interaction with dissociated air flow <i>A. A. Krupnov and M. Ju. Pogosbekian</i>	187
Advantages of high voltage consolidation of hafnium carbide powders and tungsten-based alloys <i>E. G. Grigoryev, V. Yu. Goltsev, A. V. Osintsev, A. S. Plotnikov, E. L. Strizhakov, S. V. Nescoromniy, V. G. Vinogradov, and S. O. Ageev</i>	190
Integrated simulation of plasma and gasdynamics of prospective propulsion systems with the emphasis to thermoemission cooling of their elements <i>A. V. Kolychev, V. A. Kernozhitsky, M. V. Chernyshov, and V. A. Savelov</i>	193

Powder consolidation using technological combustion for development of catalytically active membranes for hydrocarbon dehydrogenation <i>V. I. Uvarov, R. D. Kapustin, and A. O. Kirillov</i>	197
Porous catalytic-active ceramic membranes for hydrocarbon dehydrogenation <i>V. I. Uvarov, R. D. Kapustin, and A. O. Kirillov</i>	200
