

# Contents

<b>Part ONE: KINETICS AND ELEMENTARY PROCESSES</b>	<b>1</b>
Self-Consistent Models for Aerospace and Discharges <i>G. Colonna</i> . . . . .	3
Automated Method of Potential Energy Surfaces Exploring for Reactive Pathways: Reactions of Al <sub>2</sub> with O and O <sub>2</sub> <i>B. I. Loukhovitski, A. S. Sharipov, and A. M. Starik</i> . . . . .	14
Kinetics of Optically Pumped Oxygen Laser <i>M. V. Zagidullin, V. N. Azyazov, and A. S. Insapov</i> . . . . .	24
Ignition and Combustion of H <sub>2</sub> -O <sub>2</sub> Mixture upon Dissociation of O <sub>2</sub> Molecules by Laser Radiation with 193-Nanometer Wavelength <i>B. I. Brainin, S. Yu. Volkov, V. D. Kobtsev, D. N. Kozlov, S. A. Kostritsa, A. V. Pelevkin, V. V. Smirnov, O. M. Stelmakh, N. S. Titova, S. A. Torokhov, and A. M. Starik</i> . . . . .	32
Experimental Study of Pyrolysis of C <sub>2</sub> F <sub>4</sub> Br <sub>2</sub> Behind Shock Waves <i>A. V. Emelianov, A. V. Eremin, and P. I. Jatsenko</i> . . . . .	42
Products of Reaction C <sub>5</sub> H <sub>4</sub> O + H: Quantum-Chemical Studies <i>A. R. Ghildina, A. D. Oleinikov, A. M. Mebel, and V. N. Azyazov</i> . . . . .	50
Oxidation of C <sub>16</sub> H <sub>10</sub> by OH: Quantum-Chemical Studies <i>G. R. Galimova, A. M. Mebel, and V. N. Azyazov</i> . . . . .	57
Theoretical Analysis of Elementary Chemical Processes in BO-O <sub>2</sub> System <i>A. V. Pelevkin, A. S. Sharipov, and A. M. Starik</i> . . . . .	63

Nonequilibrium Processes in the Expanding Flow of Thermal N <sub>2</sub> -IF Plasma: State-to-State Consideration <i>I. N. Kadochnikov and A. M. Starik</i> . . . . .	71
Modeling of Al Nanoparticle Combustion in CO <sub>2</sub> Environment <i>P. S. Kuleshov, A. M. Savel'ev, N. S. Titova, and A. M. Starik</i> . . . . .	80
Effect of the Process of Condensed Phase Formation on the Combustion of Aluminum Nanoparticles in Water Vapor <i>V. B. Storozhev and A. N. Yermakov</i> . . . . .	89
Numerical Analysis of Combustion Enhancement in Homogeneous Charge Compression Ignition Engine via Adding Highly Reactive Species to the Charge <i>A. M. Starik, A. N. Korobov, and N. S. Titova</i> . . . . .	98

**Part TWO: PLASMA AND PLASMA-BASED TECHNOLOGIES** 107

Nonequilibrium Plasma Generated By Atmospheric Pressure Glow Discharges in Inert and Molecular Gases <i>V. I. Arkhipenko, A. V. Kazak, A. A. Kirillov, and L. V. Simonchik</i> . . . . .	109
Reduction of Ignition Delay in the H <sub>2</sub> -O <sub>2</sub> Mixture Due to Excitation of O <sub>2</sub> Molecules to the $a^1\Delta_g$ State <i>V. D. Kobtsev, S. A. Kostritsa, V. Silamikelis, V. V. Smirnov, O. M. Stelmakh, N. S. Titova, S. A. Torokhov, and A. M. Starik</i> . . . . .	120
Electrical Conductivity of Methane-Air Flame Under the Action of Weak Electric Field <i>G. Colonna, L. D. Pietanza, A. D'Angola, A. Laricchiuta, and A. Di Vita</i> . . . . .	129
Investigation of Parameters of Two-Phase High-Temperature Flow Generated by the Plasma Torch <i>V. V. Chuprasov, O. G. Penyazkov, I. N. Shatan, and M. S. Tret'yak</i> . . . . .	136

Modeling of Physical and Chemical Processes in the Dielectric Barrier Discharge in Chlorine <i>S. V. Avtaeva</i> . . . . .	143
EquilTheTA: A Web-Based Tool for Thermodynamics and Transport Properties of Thermal Plasmas <i>A. D'Angola, G. Colonna, and A. Laricchiuta</i> . . . . .	152
Chemical Kinetic Model for Atmospheric Plasma Reaction Rate in Equilibrium State <i>T. Saktioto, R. Farma, D. Irawan, M. Sufi, and F. D. Ismail</i> . . . . .	159
Spatial Separation of Particles by Alternating Electric Fields <i>D. S. Lapitsky</i> . . . . .	171
Influence of the Size Dependence of the Work Function on the Free Electron Concentration in Thermal Dusty Plasma Formed by Nanoparticles of Tungsten and Hot Inert Gas <i>I. I. Fayrushin, N. F. Kashapov, and A. I. Saifutdinov</i> . . .	179
Some Problems of Aerodynamics of a Discharge Chamber of Plasma Torch at Preparation of Nanopowders in High-Frequency Induction Plasma <i>A. V. Gerasimov and A. P. Kirpichnikov</i> . . . . .	185
Electrical Direct Current Discharges in Air at Atmospheric Pressure: The Effect of Electrode Heating on the Discharge Characteristics <i>A. I. Saifutdinov, I. I. Fayrushin, and N. F. Kashapov</i> . . .	193
Corrosion of Insulating Ceramic Materials in Plasma of Interelectrode Space of Electronic Converter <i>V. I. Uvarov, V. E. Loryan, S. V. Uvarov, and I. P. Borovinskaya</i> . . . . .	203
Initiation of Detonation in a Hypersonic Jet Engine Using a Streamer Discharge <i>V. V. Upyrev, I. I. Esakov, and L. P. Grachev</i> . . . . .	208
Study of Carbon and Fluorocarbon Coatings Produced by Plasma Arc at Atmospheric Pressure <i>A. V. Shvedov, A. N. Lyamin, V. M. Elinson, and L. I. Kravets</i> . . . . .	216

Effect of Electric Field on the Atomization of Fuel Spray  
by the Nozzle of an Aircraft Engine  
*D. Yu. Kolodyazhniy and V. S. Nagorniy* . . . . . 223

Spark Discharge Excited Supersonic Gas Jets  
*S. V. Avtaeva, A. E. Zarvin, V. V. Kalyada, A. S. Yaskin,  
and S. T. Chinenov* . . . . . 232

Ions Energy Distribution Functions in the Cathode Region  
of a Glow Discharge in Nitrogen  
*A. A. Platonov, E. I. Prokhorova, and A. G. Slyshov* . . . . 241

**Part THREE: CLUSTERS, NANOPARTICLES  
AND THEIR APPLICATION** 247

Theoretical Study of Physical and Thermodynamic Properties  
of Small  $Al_nB_m$  Clusters  
*A. S. Sharipov, B. I. Loukhovitski, and A. M. Starik* . . . . 249

Size Dependence of Evaporation Temperature  
of Iron Nanoparticles  
*A. Eremin and E. Gurentsov* . . . . . 257

Nanomaterials Synthesis in Two-Stage Flame of Hydrocarbons  
*B. T. Lesbayev, N. G. Prikhodko, M. Nazhipkyzy,  
N. B. Rakhimzhan, G. T. Smagulova, T. S. Temirgaliyeva,  
A. Nurgojayeva, and Z. A. Mansurov* . . . . . 266

Synthesis of Graphene in Flame at Exposed  
to an Electric Field  
*N. G. Prikhodko, N. B. Rakhimzhan, M. Auyelkhankyzy,  
G. T. Smagulova, B. T. Lesbayev, M. Nazhipkyzy,  
T. S. Temirgaliyeva, and Z. A. Mansurov* . . . . . 276

Self-Propagating High-Temperature Synthesis of Boron  
Carbide: Structural Features and Carbon Ordering  
Investigation  
*I. D. Kovalev, V. I. Ponomarev, S. V. Konovalikhin,  
M. A. Luginina, and V. I. Vershinnikov* . . . . . 286

Perspectives of the Usage of Small Clusters as Energetic  
Components of Solid Propellants  
*A. M. Savel'ev, B. I. Loukhovitski, A. S. Sharipov,  
and A. M. Starik* . . . . . 293

Binary Iron–Carbon Nanoparticle Synthesis in Photolysis of $\text{Fe}(\text{CO})_5$ with Various Hydrocarbons <i>A. V. Eremin, E. V. Gurentsov, E. Yu. Mikheyeva,</i> <i>and S. A. Musikhin . . . . .</i>	300
Investigation of Hardness and Toxicity to Cellular Elements of Blood for Nanostructured Fluorocarbon Films on the Polystyrene Surface <i>E. V. Rusanova, V. M. Elinson, P. A. Shur,</i> <i>E. E. Umpierre, and O. A. Silnitskaya . . . . .</i>	311
